

**Key**

- |   |                                      |    |   |
|---|--------------------------------------|----|---|
| 1 | heat-resistant glass                 | 7  | limitation for trestle                    |
| 2 | stainless steel $t = 1,5$            | 8  | limitation for burner                     |
| 3 | refractory material                  | 9  | thermocouple                              |
| 4 | guidance rail for burner and trestle | 10 | sealing cord heat resistant <i>simon!</i> |
| 5 | stainless steel $t = 5$              | 11 | hollow profile <i>surj profil</i>         |
| 6 | floor sheet                          |    |   |

- (A) measuring point for pre-heat temperature      (C) opening for air velocity meter
- (B) measuring point for air velocity
