

We urgently need the following;

\* French Beech Logs :

Diameter : 50cm up , measured by middle of the logs ;

Length : 5m up ;

Grade : A/B mixed , Grade A means without knots and brown / red heart , Grade B means some knots and brown / red heart smaller than 30% of the diameter

Order volume : First order 500 cbm , annual forecast volume 5000 cbm (purchase monthly by monthly)

Reference payment terms : 90days L/C

Reference port: CIF Qingdao ;

Other : Original from France . When doing the measurement , the diameter will be reduced 2cm (that because of the bark ) and the length will be reduced 40cm (free trim), eg , if the log is middle diameter 50cm and length 5.8m , it will be measured as diameter 48cm and length 5.4m

\* White Oak Logs

Diameter : 30cm + , 30cm~39cm less than 15% ,

Length = 2.5~3m will be less than 10% otherwise lengths are longer than 3m

Measure Method : Use middle diameter , include bark ; Side to Side length, free trim 10cm to 20cm

Grade : B/C Grade , Proportion 50%/50%

Promised supply volume : Trail order 250 cbm ; Monthly 500cbm can be assumed

Reference port : CIF ZhaPu

\* Birch Logs

Grade :A/B(not allowed sorted good quality out )

Diameter(under bark):20cm+up

Length :2.7m,3.0m

Free trim :+10cm

One Live knots on the meter ,Maximum three knots on the log , not allowed black knots . Maximum knot diameter 5cm , crook 1.5%.

Fresh cut logs( not over 2 week after cut,not allowed stain before loading container), brown or red heart: not exceed20% of diameter at the measured log end.

Target port : CIF Qingdao
